

Salmac's Exclusive Scallop Supply

Salmac specialises in the production of premium quality king scallops and our strong supply base ensures guaranteed, year-round supply.

The exclusivity of our source of supply is the key to our success in the scallop trade. We have forged strong partnerships with a number of Scottish scallop fishing boats, thus linking us directly to the source and allowing for full product traceability.

Daily landings are processed immediately at our two dedicated factories, ensuring the highest standards of freshness and quality. Packaging and specification can be adapted to satisfy customer needs. Our scallops are renowned for being extra dry and large (18-22/kg).

Our team ensures Salmac's fresh king scallops are caught and packaged daily in Scotland for next day delivery to the UK, Ireland and the rest of Europe. Salmac can also offer frozen King scallops, which are shucked within hours of landing, frozen in an EFSIS Grade A freezing plant, then glazed, hand-packed and labelled to your specification.
